Experience

Josh Technology Group

July 2025 – Present

Full Stack Developer

On Site

- Worked as a Full Stack Developer at Josh Technology Group, building and maintaining scalable web applications using React for the frontend and Django/FastAPI for backend services.
- Collaborated in agile teams, contributed to feature development, debugging, and code reviews while maintaining clean, efficient, and production-ready code.

EngineerHub

April 2024 – December 2024

Campus Ambassador

Remote

- I represented EngineerHUB as a campus ambassador, effectively bridging the gap between the organization and the student community. spearheaded impactful promotional initiatives to boost recognition of EngineerHUB's services among students.
- I successfully oversaw the management of social media accounts and online presence to actively engage our target audience and effectively promote the activities of EngineerHUB.

Technical Skills

Languages: C/C++, HTML/CSS, JavaScript, TypeScript, Node, Python

Developer Tools: VS Code, Postman, Git, Docker, Sentry, New Relic, Kubernetes

Libraries/Frameworks: React, Next, Express, TailwindCSS, Prisma, FastApi, Django, DRF, Tortoise, Pydantic

Database: MongoDB, PostgreSQL

Projects

Restroo | Next, Express, TS, PostgreSQL, Prisma, Admin Js  

April 2025

- Engineered a full-stack restaurant ordering system enabling food outlets and canteens to digitally host menus via QR codes, increasing customer convenience and reducing wait times.
- Developed two separate frontend interfaces for admins (restaurants) and customers using Next.js and Tailwind CSS, ensuring seamless interaction and role-specific experiences.
- Enabled real-time order processing and dynamic menu management using RESTful APIs with Express.js and PostgreSQL, improving operational efficiency.
- Optimized database queries using Prisma ORM, enhancing response times and data integrity in a multi-user environment.

Rapid Share | Next, TailwindCSS, Express, TS, PostgreSQL, Prisma  

February 2025

- Developed a secure file-sharing platform with envelope encryption, password protection, and temporary file expiration for privacy-focused transfers.
- Implemented Zstandard (Zstd) compression to reduce file size and improve upload/download performance while maintaining secure data transfer.

Study Notion | MERN Stack, TailwindCSS  

August 2024

- Built Study Notion, a full-stack e-learning application supporting course creation, enrollment, and progress tracking for students and instructors.
- Implemented payment integration via Razorpay, enabling secure and seamless course purchases, increasing monetization potential.
- Integrated backend APIs with MongoDB and Express.js, ensuring scalable and high-performance content delivery.

Education

IIMT College of Engineering

Aug. 2022 – July 2026

Bachelor of Science in Computer Science (8 cgpa)

Greater Noida, U.P.

Relevant Coursework

- Data Structures
- Database Management
- Operating System
- Algorithm Analysis
- Networking

Achievements

- Successfully solved around 500+ problems on various platforms.
- Placed in 3rd position at IIMT Coding Contest.
